REPROCESSING DISPOSABLE STETHOSCOPES

Effective today, 4/17/2020, please do not discard the isolation disposable stethoscopes.

- Please place stethoscopes in the same bin where you are placing your N-95s and surgical masks for reprocessing.
- The stethoscopes will be disinfected and reprocessed.
- There is no need to label these with your name, since they will not be returned to the previous owner.

Thank you for your cooperation.
